PROFESSIONAL PROFILE

Computer Engineer with more than 6 years of experience, I stand out for my extensive knowledge in the development of web and mobile applications using cutting-edge technologies such as React JS and React Native. My career has been driven by an innate passion for computing and an unwavering commitment to excellence in every project I participate in. Throughout my career, I have led the successful development of various applications, demonstrating solid skills in creating dynamic and efficient user interfaces. My experience ranges from conceptualization to implementation, always focused on delivering high-quality solutions and optimizing the user experience. As a committed engineer, my goal is to contribute to the growth of innovative teams and projects, contributing not only my technical skills, but also my dedication and enthusiasm for creating cutting-edge technological solutions.
